

## **Hellian Oilfield Frac Heater Specs**

### **60MM BTU Trailer Mounted Unit**

- Propane or natural gas high efficiency burners
  - 92% efficiency on NG / 90.5% efficiency on LPG
- Custom Coil design allows high volume slipstream capabilities through 6" connections
  - 7.0 M<sup>3</sup>/min @18.5C temp rise
  - 5.0 M<sup>3</sup>/min @ 26C temp rise
  - 3.0 M<sup>3</sup>/min @ 43C temp rise
- Additionally equipped with a 4" x 3" x 14" pump, driven by Cummins 4 cylinder Diesel. Equipped with four - 4" suction and four - 4" discharge connections
- Utilizing the self-contained pump, the unit is capable of heating 2.7M<sup>3</sup>/Min @ 45C temp rise
- Coil design allows for heating of fresh water, CKL, or flow back fluids
- Trailer mounted 10,800 L propane tank
- Redundant high temp and hi/low volume safety switches eliminating single point failures
- Reliable, field tested control system
